Professional Summary

I am a third-year Computer Science Engineering student at Sri Krishna College of Engineering and Technology, skilled in frontend development, C++, Java, and Python, and currently expanding my expertise in Artificial Intelligence and Cloud Technologies. With experience in projects, internships, hackathons, and coding competitions, I enjoy solving real-world problems through software development and AI-driven solutions. Passionate about learning and innovation, I aim to contribute to impactful technology-driven projects.

Education

B.E. Computer Science and Engineering Sri Krishna College of Engineering and Technology	2023 – 2027
--	-------------

Certifications

- Google Cloud Foundations - Google Micro-Certification
 - Welcome to ServiceNow - ServiceNow
 - AWS Cloud Practitioner Essentials – MindLuster
 - Introduction to Generative AI Studio – Simplilearn (Google Cloud Certification)
-

Skills

Frontend development	Project Management
Web development	Teamwork
C++	Time Management
JAVA	Leadership
Python	Effective Communication
Artificial Intelligence	Critical Thinking
Problem Solving	

Internships

- | | |
|--|-----------------------------|
| • Programming Intern (C++)
Codsoft | Mar 2024 - Mar 2024 |
| • Python developer | May 2024 - June 2024 |

CognoRise

- **Programming intern (JAVA)** **Aug 2024 - Sept 2024**
TechnoHacks
 - **Frontend Developer** **May 2025 - June 2025**
Alfido Tech
-

Hackathons

Voyage (VIT) - Entropy Hackathon **Aug 2024** **Finalist**

Built a **Smart Campus Navigator** with interactive maps and event updates. Worked as **Frontend Developer & UI Designer** ensuring a user-friendly interface. Developed under the theme of **entrepreneurial innovation** at VIT Chennai's Entropy Hackathon.

HackHerWay (CIT) **Oct 2024** **Finalist**

Designed a Medical Report Management System to streamline storage, access, and sharing of patient medical records. Contributed as Frontend Developer & UI Designer, ensuring an intuitive and user-friendly interface. Built under the theme of healthcare innovation at HackHer Way – Women's Hackathon

Codeathon (Thiran) **Feb 2025** **Special mention award**

Developed "Oru Sooru" – a food redistribution platform to minimize hunger by channeling surplus food from restaurants and events to the needy. Contributed as Ideator, Frontend Developer & UI Designer, implementing efficient food allocation using a Dynamic Prioritization Algorithm (DPA) and real-time location tracking with Google Maps API. Built under the theme of Zero Hunger at Thiran Hackathon

Projects

- Event Management - REST API
 - Moving Object Detection - AI using Python
 - Face detection and recognition - Ai using Python
 - Advanced to-do app with calendar and reminders - Web development full project
-
